**Attention:** The Directors

# NewFunds Collective Investment Scheme in Securities (the Scheme) – Year End 31 December 2021

We, Standard Chartered Bank, Johannesburg Branch, in our capacity as trustee of the Scheme, are required in terms of Section 70(3) of the Collective Investments Scheme Control Act, 45 of 2002, as amended (the "Act"), to satisfy ourselves that every Statement of Financial Position, Statement of Comprehensive Income and other return prepared by the manager of the Scheme in terms of Section 90 of the Act (the "Accounts") fairly represents the assets and liabilities, as well as the income and distribution of income, of every portfolio of the Scheme administered by the manager of the Scheme.

We note that responsibility for the Accounts rests with the manager of the scheme in terms of the Act and that they have the obligation to ensure that the Accounts have been properly drawn up in accordance with both generally accepted accounting principles and the Act and that they fairly represent the financial position of each portfolio of the Scheme. Nothing in this report can be construed as us giving an accounting opinion in relation to the Accounts.

Based on our records, and the Accounts, we hereby report that nothing has come to our attention that would lead us to believe anything other than:

- (a) the fact that the Accounts fairly represent the assets and liabilities of every portfolio of the Scheme;
- (b) the fact that the Accounts fairly represent the income and distribution of income of every portfolio of the Scheme; and
- (c) the fact that the Manager has administered the scheme in accordance the provisions of the Act and the relevant deed.

#### **Standard Chartered Bank**

standard chartered

Sincerely,

Chantell Kruger

Senior Manager, Trustee Services

Contactor

Chantelle Gertenbach

Manager, Trustee Operations

DIRECTORS' RESPONSIBILITIES AND APPROVAL

for the year ended 31 December 2021

The directors are responsible for overseeing the preparation, integrity and objectivity of the annual financial statements that fairly present the state of the affairs of the Scheme at the end of the financial year and the financial performance and cash flows for the reporting period, and other information contained in this report.

Each Scheme's annual financial statements comprise the statement of comprehensive income at the reporting date, the statements of financial position, changes in net assets attributable to investors, cash flows for the year then ended and the notes to the annual financial statements, which include a summary of significant accounting policies and other explanatory notes, in the manner required by The Collective Investment Scheme Control Act of South Africa of 2002, International Financial Reporting Standards and the Trust Deed.

To enable the directors to meet these responsibilities:

J Fearnhead

- All directors will endeavour to maintain the highest ethical standards in ensuring the Scheme's business
  is conducted in a manner that in all reasonable circumstances is above reproach;
- The directors set standards and management implements systems of internal control and accounting and information systems aimed at providing reasonable assurance that both on and off statement of financial position assets are safeguarded and the risk of error, fraud or loss is reduced in a cost-effective manner. These controls, contained in established policies and procedures, include the proper delegation of responsibilities and authorities within a clearly defined framework, effective accounting procedures and adequate segregation of duties;
- The directors and management identify all key areas of risk across the Scheme and endeavour to
  mitigate or minimise these risks by ensuring that appropriate infrastructure, controls, systems and
  discipline are applied and managed within predetermined procedures and constraints;
- The internal audit function outsourced to Absa Group Internal Audit, which operates unimpeded and independently from operational management, appraises, evaluates and, when necessary, recommends improvements to the systems of internal control and accounting practices, based on audit plans that take cognisance of the relative degrees of risk of each function or aspect of the business; and
- The internal auditors play an integral role in matters relating to financial and internal control, accounting policies, reporting and disclosure.

To the best of their knowledge and belief, based on the above, the directors are satisfied that no material breakdown in the operation of the systems of internal control and procedures has occurred during the year under review.

The Scheme consistently adopts appropriate and recognised accounting policies and these are supported by reasonable and prudent judgements and estimates on a consistent basis. The annual financial statements of the Scheme have been prepared in accordance with the provisions of the Collective Investments Control Act of 2002 and the Trust Deed and comply with International Financial Reporting Standards (IFRS) and all applicable legislation.

The directors have no reason to believe that the Scheme will not be a going concern in the reporting period ahead, based on forecasts and available cash resources. These financial statements have accordingly been prepared on this basis.

It is the responsibility of the independent auditors to report on the annual financial statements. Their report to the investors is set out on pages 4 to 6.

The annual financial statements set out on pages 9 to 35 were approved by the directors on 24 March 2022 and were signed on its behalf by:

EY 102 Rivonia Road Sandton Private Bag X14 Sandton Ernst & Young Incorporated Co. Reg. No. 2005/002308/21 Tel: +27 (0) 11 772 3000 Fax: +27 (0) 11 772 4000 Docex 123 Randburg ev.com

# INDEPENDENT AUDITOR'S REPORT TO THE MANAGER AND HOLDERS OF SECURITIES IN THE NEWFUNDS COLLECTIVE INVESTMENT SCHEME S&P NAMIBIA BOND ETF PORTFOLIO

### Report on the Audit of Annual Financial Statements

#### Opinion

We have audited the financial statements of NewFunds Collective Investment Scheme S&P Namibia Bond ETF Portfolio (the Portfolio) as set out on pages 9 to 35, which comprises the statement of financial position as at 31 December 2021, the statement of comprehensive income, the statement of changes in net assets attributable to investors, the statement of cash flows for the period then ended, and notes to the financial statements, including a summary of significant accounting policies and explanatory information.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Portfolio as at 31 December 2021, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Collective Investments Schemes Control Act of South Africa.

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Separate Financial Statements section of our report. We are independent of the company in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements of the company and in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits of the company and in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. We have determined that there are no key audit matters to communicate in our report.

#### Other Information

The directors are responsible for the other information. The other information comprises the Directors' Responsibilities and Approval, Trustees' Report and Directors' Report, which we obtained prior to the date of this report. Other information does not include the financial statements and our Auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Collective Investment Schemes Control Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Portfolio's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Portfolio or to cease operations, or has no realistic alternative but to do so.

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and
  obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The
  risk of not detecting a material misstatement resulting from fraud is higher than for one
  resulting from error, as fraud may involve collusion, forgery, intentional omissions,
  misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing
  an opinion on the effectiveness of the Portfolio's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Portfolio's ability to

continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Portfolio to cease to continue as a going concern.

• Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Report on other Legal and Regulatory Requirements

In terms of the IRBA Rule published in the Government Gazette Number 39475 dated 4 December 2015, we report that Ernst & Young Inc. has been the auditor of the Portfolio within NewFunds Collective Investment Scheme for 9 years.

NewFunds Collective Investment Scheme manages exchange traded fund (ETF) portfolios. Its objective is to track the performance of specific indices on the stock market in each portfolio. The NewFunds S&P Namibia Bond ETF portfolio (the portfolio or Namibia Bond ETF) tracks the total return version of the S&P Namibia Sovereign Bond Index. The index consists of the top 10 largest sovereign bonds issued by the government of Namibia. The portfolio is listed on both the Namibian Stock Exchange (NSX) and the Johannesburg Stock

Exchange (JSE).

Summary of Accounting Policies for the year ended 31 December 2021

### 1. STATEMENT OF COMPLIANCE

The annual financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and the interpretations issued by the International Financial Reporting Interpretations Committee of the IASB (IFRS-IC) and the requirements of the Collective Investments Schemes Control Act of 2002, the Trust Deed, JSE Listing Requirements and the FRSC Financial Reporting Guides.

# 2. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these annual financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### 2.1 ADOPTION OF NEW AND REVISED ACCOUNTING STANDARDS

During the current year, the Scheme has adopted all of the new and revised standards and interpretations issued by the IASB and the IFRS-IC that are relevant to its operations and effective for annual reporting periods beginning on 1 January 2021. The adoption of these new and revised standards and interpretations has not resulted in material changes to the Scheme's accounting policies. For details of the new and revised accounting policies refer to note 20.

### 2.2 BASIS OF PREPARATION

Apart from certain items that are carried at fair value, as explained in the accounting policies below, the financial statements have been prepared on the historical cost basis. The principal accounting policies are set out below.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern.

The financial statements are presented in South African Rands (R), the presentation and functional currency of the Scheme. All financial information is presented to the nearest Rand.

#### 2.3. EFFECTIVE INTEREST INCOME

Effective interest income on a mortised cost financial instruments is recognised in profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash flows through the expected life of the financial instrument to that instrument's net carrying a mount on initial recognition.

# 2.4 INVESTMENT INCOME

Investment income comprises of coupon interest income and scrip lending income.

Coupon interest recognised on investments measured at Fair Value through Profit and Loss is presented as part of investment income.

The Scheme engages in securities lending in respect of the securities held by the portfolio, in line with the FSCA and as set out in the Scheme's Trust Deed . The fees earned for the administration of securities lending activities are received by the management company and are distributed to the benefit of all investors by way of reduction of management fees.

**Summary of Accounting Policies (continued)** 

for the year ended 31 December 2021

# 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

# 2.5 FINANCIAL INSTRUMENTS

#### 2.5.1 INITIAL RECOGNITION OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

Financial assets and liabilities are recognised when it becomes a party to the terms of the contract, which is the trade date. All financial instruments are measured initially at fair value plus/minus transaction costs, except in the case of financial assets and financial liabilities recorded at fair value through profit or loss, where transaction costs are expensed upfront.

On initial recognition, it is presumed that the transaction price is the fair value unless there is observable information a vailable in an active market to the contrary. The best evidence of an instrument's fair value on initial recognition is typically the transaction price. However, if fair value can be evidenced by comparison with other observable current market transactions in the same instrument, or is based on a valuation technique whose inputs include only data from observable markets then the instrument should be recognised at the fair value derived from such observable market data.

For valuations that have made use of significant unobservable inputs, the difference between the model valuation and the initial transaction price ("Day one profit or loss") is recognised in profit or loss either on a straight-line basis over the term of the transaction, or over the reporting period until all model inputs will become observable where a ppropriate, or released in full when previously unobservable inputs become observable.

### 2.5.2 CLASSIFICATION AND MEASUREMENT OF FINANCIAL INSTRUMENTS

On initial recognition, financial assets are classified into the following measurement categories:

- Amortised cost:
- Fair value through other comprehensive income; or
- Fair value through profit or loss.

The classification and subsequent measurement of financial assets depends on:

- The business model within which the financial assets are managed; and
- The contractual cash flow characteristics of the asset (that is, whether the cash flows represent "solely payments of principal and interest").

# Business model assessment:

The business model reflects how the NewFunds Collective Investment Scheme manages the financial assets in order to generate cash flows and returns. The NewFunds Collective Investment Scheme makes an assessment of the objective of a business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The factors considered in determining the business model include

- (i) how the financial assets' performance is evaluated and reported to management;
- (ii) how the risks within the portfolio are assessed and managed; and
- the frequency, volume, timing for past sales, sales expectations in future periods, and the reasons for such sales. The NewFunds Collective Investment Scheme reclassifies debt instruments when, and only when, the business model for managing those assets changes. Such changes are highly unlikely and therefore expected to be very infrequent.

Summary of Accounting Policies (continued) for the year ended 31 December 2021

# 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

# 2.5 FINANCIAL INSTRUMENTS (continued)

#### 2.5.2 CLASSIFICATION AND MEASUREMENT OF FINANCIAL INSTRUMENTS(continued)

Assessment of whether contractual cash flows are solely payments of principal and interest (SPPI):

In making the assessment of whether the contractual cash flows have SPPI characteristics, the NewFunds Collective Investment Scheme considers whether the cash flows are consistent with a basic lending arrangement. That is, the contractual cash flows recovered must represent solely the payment of principal and interest. Principal is the fair value of the financial asset on initial recognition. Interest typically includes only consideration for the time value of money and credit risk but may also include consideration for other basic lending risks and costs, such as liquidity risk and administrative costs, together with a profit margin. Where the contractual terms include exposure to risk or volatility that is inconsistent with a basic lending arrangement, the cash flows would not be considered to be SPPI and the assets would be mandatorily measured at fair value through profit or loss, as described below. In making the assessment, the NewFunds Collective Investment Scheme considers, inter a lia, contingent events that would change the amount and timing of cash flows, prepayment and extension terms, leverage features, terms that limit the NewFunds Collective Investment Scheme's claim to cash flows from specified assets (e.g. non-recourse asset arrangements), and features that modify consideration of the time value of money (e.g. tenor mismatch). Contractual cash flows are assessed against the SPPI test in the currency in which the financial asset is denominated.

### **Debt Instruments:**

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective, such as loans and government and corporate bonds. The NewFunds Collective Investment Scheme classifies its debt instruments as follows:

- i. Amortised cost Financial assets are classified within this measurement category if they are held within a portfolio whose primary objective is the collection of contractual cash flows, where the contractual cash flows on the instrument are SPPI, and that are not designated at fair value through profit or loss. These financial assets are subsequently measured at a mortised cost where interest is recognised as effective interest income. The carrying amount is adjusted by the cumulative expected credit losses recognised.
- ii. Fair value through other comprehensive income (OCI) This classification applies to financial assets which meet the SPPI test, and are held within a portfolio whose objectives include both the collection of contractual cash flows and the selling of financial assets. These financial assets are subsequently measured at fair value with movements in the fair value recognised in other comprehensive income, with the exception of interest income, expected credit losses and foreign exchange gains and losses that are recognised within profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to "Gains and losses from banking and trading activities" in profit or loss. Interest income from these financial assets is included as "Effective interest income" using the effective interest rate method.

Summary of Accounting Policies (continued) for the year ended 31 December 2021

# 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

# 2.5 FINANCIAL INSTRUMENTS (continued)

### 2.5.2 CLASSIFICATION AND MEASUREMENT OF FINANCIAL INSTRUMENTS (continued)

# Debt Instruments (continued)

iii. Fair value through profit or loss - Financial assets that do not meet the criteria for a mortised cost or fair value through other comprehensive income are mandatorily measured at fair value through profit or loss. Gains and losses on these instruments are recognised in fair value a djustment in profit or loss. The NewFunds Collective Investment Scheme may also irrevocably designate financial assets that would otherwise meet the requirements to be measured at amortised cost or at fair value through other comprehensive income, as at fair value through profit or loss, if doing so would eliminate or significantly reduce an accounting mismatch that would otherwise arise. These will be subsequently measured at fair value through profit or loss with gains and losses recognised as fair value adjustment in profit or loss.

#### Financial Liabilities

Financial liabilities arising from the securities issued by the Portfolio are measured at fair value representing the investor's right to an interest in the Portfolio's net assets, i.e. the Net Asset Value ("NAV") of the Portfolio. Changes in the fair value are included in profit or loss in the period in which the change arises and these financial liabilities are designated at fair value through profit or loss. Gains and losses on financial liabilities are presented in OCI to the extent that they relate to changes in own credit risk. For the current period there were no significant changes in own credit risk.

# Net assets attributable to investors (redeemable securities)

All redeemable securities provided by the portfolios provide investors with the right to request redemption for cash or in specie at the value proportionate to each investor's share. The securities are redeemable at any time at the option of the security holder and are therefore classified as financial liabilities. These are measured at the redemption amounts.

**Summary of Accounting Policies (continued)** 

for the year ended 31 December 2021

# 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

# 2.5. FINANCIAL INSTRUMENTS (continued)

#### 2.5.2 CLASSIFICATION AND MEASUREMENT OF FINANCIAL INSTRUMENTS(continued)

### **OTHER RECEIVABLES**

Other receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Other receivables are measured at a mortised cost using the effective interest method, less any impairment.

Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

#### **OTHER PAYABLES**

Other payables are measured at amortised cost except for liabilities designated at fair value which are held at fair value through profit and loss. Amortised cost is the initial fair value (which is normally the amount borrowed) adjusted for premiums, discounts, repayments and the amortisation of coupon, fees and expenses to represent the effective interest rate of the liability.

#### **FAIR VALUE**

The listed underlying investments are mandatorily measured at fair value through profit or loss.

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

### 2.5.3 DERECOGNITION OF FINANCIAL INSTRUMENTS

Derecognition of financial assets

Full derecognition only occurs when the rights to receive cash flows from the asset have been discharged, cancelled or have expired, or the Scheme transfers both its contractual right to receive cash flows from the financial assets (or retains the contractual rights to receive the cash flows, but assumes a contractual obligation to pay the cash flows to another party without material delay or rein vestment) and substantially all the risks and rewards of ownership, including credit risk, prepayment risk and interest rate risk.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same party on substantially different terms, or the terms of an existing liability are substantially modified (taking into account both quantitative and qualitative factors), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss. Where the terms of an existing liability are not substantially modified, the liability is not derecognised. Costs incurred on such transactions are treated as an adjustment to the carrying amount of the liability and are amortised over the remaining term of the modified liability.

**Summary of Accounting Policies (continued)** 

for the year ended 31 December 2021

# 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

# 2.5. FINANCIAL INSTRUMENTS (continued)

# 2.5.4. OFFSETTING

In accordance with IAS 32 Financial Instruments: Presentation, the Scheme reports financial assets and financial liabilities on a net basis on the statement of financial position only if there is a current legally enforceable right to set off the recognised amounts and there is intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

# 2.6 CASH AND CASH EQUIVALENTS

For the purposes of the statement of cash flows, cash comprises cash on hand and demand deposits and cash equivalents comprise highly liquid investments that are convertible into cash with an insignificant risk of changes in value with original maturities of three months or less.

#### 2.7 SEGMENTAL REPORTING

The portfolio trades under the umbrella of the NewFunds Collective Investment Scheme ("CIS") as separate exchange traded fund. The Scheme is separately listed and trades on the JSE. Thus each of the separate portfolios fall within the scope of IFRS 8: Operating Segments. This Scheme has a narrowly defined mandate and operates a single line of business. Therefore, the Scheme as a whole is considered to be one operating segment.

### 2.8 DISTRIBUTIONS

The portfolio tracks a total return index and therefore all distributions from the constituents are not paid to investors but are reinvested through the additional constituent securities.

### 2.9 TAXATION

Income is taxed in the hands of the investor if the portfolio distributes within 12 months of having received income, failing which income will be deemed to be received by, and accrued to the portfolio and will be taxed in its hands. Capital gains and losses are ultimately taxed in the investor's hands on disposal of their participatory interest.

The portfolio has distributed income within 12 months of receiving it within the current and prior year. Therefore, no income tax has been provided for in the portfolio in the current and prior year.

Notes to the annual financial statements

	Securities lending fee income	9 786	61 508
		30 589 872	24 084 482

# 4. INCREASE IN NET ASSETS ATTRIBUTABLE TO INVESTORS BEFORE DISTRIBUTION

Included in net assets attributable to investors before distribution are the following significant transactions:

Management fee (380 069) (360 171)

#### 5. TOTAL EXPENSE RATIOS

Increased customer demand for greater transparency in financial services and the recognition thereof by the collective investment industry requires Collective Investment Scheme managers to calculate and publish a Total Expense Ratio (TER) for each portfolio under their management. This is a requirement in terms of the Association of Collective Investment Scheme (ACI) standard on the calculation and publication of TER.

The ACI Guidelines on TERs require that a Scheme must be in existence for more than 6 months before expense ratios can be calculated and published.

The TER by definition as expressed in the ACI standards is a measure of the portfolio's assets that were relinquished as payment for services rendered in the management of the portfolio. This is expressed as percentage of the fraction; total expenses paid for by a portfolio for the previous 12 months divided by the daily a verage net asset value for the previous 12 months.

# 6.3 PARTICIPATION INTEREST

The Scheme is the primary issuer of participatory interests for the NewFunds CIS ETFs. The Scheme is obliged to sell and repurchase one or more basket of participatory interests requested or offered from or to it by investors. There is a provision that a scheme can never be obliged to deliver part of a basket. As participatory interests are listed on the Namibian Stock Exchange (NSX) and Johannesburg Stock Exchange (JSE), typically, investors can buy or sell partial baskets of their participatory interests on the secondary market (and may contact either of the participating brokers or the market maker in this regard). Partial baskets of the portfolio are traded on the secondary market as Namibia Bond Index Securities (NFNAMB) on the Namibian Stock Exchange.

Proceeds received from the issue of Namibia Bond Index securities are utilised to buy Namibia Bond baskets of selected constituents.

The net asset value per Namibia Bond Index Security, after attributable amounts, at 31 December 2021 was **R16.57** (31 December 2020: R15.92).

 $Notes \ to \ the \ annual \ financial \ statements \ (continued)$ 

for the year ended 31 December 2021

### 7. SECURITIES LENDING

The Manager of the Namibian Bond ETF is permitted to engage in securities lending in respect of the securities held by the portfolio as envisaged in the offering circular. FSCA and the Trust Deed also permit securities lending in the portfolio, subject to the following limitations:

- Not more that 50% of the market value of all the securities in the portfolio can be lent;
- The securities that may be lent to one borrower are limited in a coordance with the limits determined by the registrar for the inclusion of money market instruments in a portfolio;
- Securities may not be lent for a period longer than 12 months; and
- Securities may not be lent unless subject to a right of recall.

The portfolio's exposure to credit risk is mitigated by the fact that the management company can only accept collateral security which exceeds the market value of the securities loaned in the form of:

- 105% Cash Deposit (including Call and Fixed Cash);
- 110% Bonds restricted to the top South Africa Bank and Government Bonds'
- 105% Money Market Instruments restricted to the top South African Banks; and
- 115% 120% SA Equities.

The market value of securities lending exposures as at 31 December as follows:

	2021	2020
	R	R
Securities out on loan		
Absa Bank Limited	331 507	-
	331 507	-
Cash collateral held on securities out on loan		
Absa Bank Limited	348 846	-
	348 846	-

The maximum credit risk the Portfolio is exposed to is **R 331 507** (2020: R 0) should the borrowers default. The securities out on loan represents 0.1% (2020: 0%) of the market value of the portfolio. The fees earned for the administration of securities lending activities are received by the management company and are distributed to the benefit of all investors by way of reduction of management fees.

Notes to the annual financial statements (continued) for the year ended 31 December 2021

# 12. RISK MANAGEMENT

### 12.1 CAPITAL RISK MANAGEMENT

The Scheme monitors capital on the basis of the value of net assets attributable to investors. The Scheme's objectives when managing capital are to safeguard its ability to continue as a going concem in order to provide returns for investors and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or a djust the capital structure, the Scheme may adjust the amount of distributions paid to investors. There are no externally imposed capital requirements on the Scheme.

# 12.2 FINANCIAL RISK MANAGEMENT

The Scheme's business involves taking on risks in a targeted manner and managing them professionally. The core functions of the Scheme's risk management are to identify all key risks for the Scheme, measure these risks, manage the risk positions and determine capital allocations. The Scheme regularly reviews its risk management policies and systems to reflect changes in markets, products and best market practice.

The Scheme's aim is to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Scheme's financial performance. The Scheme defines risk as the possibility of losses or profits foregone, which may be caused by internal or external factors.

The risks arising from financial instruments to which the Scheme is exposed are financial risks, which include credit risk, liquidity risk, and market risk which are discussed below. Market risk has been identified as the most significant risk to the Scheme.

With regards to the NewFunds S&P Namibia Bond ETF portfolio the financial instruments consist mainly of underlying listed investments, cash and cash equivalents, other receivables and other payables.

### 12.3 MARKET RISK

Marketrisk exists where significant changes in yields will affect the value of the portfolio's index securities. The Scheme's investment mandate is to passively manage each portfolio. As a result it is subjected to a similar nature and level of market risk as the benchmark portfolio.

There is no guarantee that the Scheme's portfolios will achieve its investment objective of perfectly tracking the index. The value of portfolio index securities and distributions payable by the Scheme's portfolios will rise and fall as the capital values of the underlying securities housed in the portfolio and the income flowing therein fluctuates. Prospective investors should be prepared for the possibility that they may sustain a loss.

The Scheme's index securities may not be able to perfectly replicate the performance of a specific index because:

- The Scheme is liable for certain costs and expenses not taken into account in the calculation of the index, this is applicable to a total return index;
- Certain Index constituents may become temporarily unavailable; or
- Other extra ordinary circumstances may result in a deviation from precise index weightings.

Notes to the annual financial statements (continued)

for the year ended 31 December 2021

# 12. RISK MANAGEMENT (continued)

# 12.3 MARKET RISK (continued)

### **Price Sensitivity Analysis**

All the investments, in portfolios of the Scheme's portfolios, are listed on the JSE. Index securities are created with an objective to track the performance of specific portfolio indexes (customised indexes).

Any movement or adjustment in the specific portfolio index will have an impact on the price of the investment in the portfolio. At any point in time the market value of one unit in the portfolio may be expected to reflect  $1/10^{th}$  of the Index level, plus an amount which reflects a pro rata portion of any accrued distribution amount within the portfolio.

Actual market values may be affected by supply and demand and other market factors, however the ability of a holder to switch out of any ETF portfolio securities by redeeming them in specie for one or more baskets of the constituent securities, should operate to substantially a void or minimise any differential which may otherwise a rise between the relevant basket and the value at which any portfolio securities trade from time to time.

The Namibia Bond Index Securities investment portfolio of **R327294020** (2020: R274191 365) is affected by price fluctuations.

At reporting date a 10% decrease in the value of the investment in the portfolio's security price would decrease the index and resulting profit of the portfolio by **R32729402**(2020: R27419137).

At reporting date a 10% increase in the value of the investment in the portfolio's security price would increase the index and resulting profit of the portfolio by **R32729402** (2020: R27 419 137).

### 12.4 INVESTMENT RISK

There can be no assurance that the investment in portfolios will achieve their investment objectives of replicating the yield performance of the portfolio index securities. The net asset value of the portfolio index securities will rise and fall as the value of the underlying portfolio fluctuates. The return achieved on portfolio index securities can be expected to fluctuate in response to changes in the return achieved by the underlying portfolio.

On a monthly basis, the index is a djusted to ensure that the constituent securities in the index are the top performing Namibian government bonds. Thus adjustments, such as removing a bond that is not performing well or a change in the weighting of the bonds, are performed.

The following factors could negatively impact on the investment performance of the portfolios:

- Certain costs and expenses incurred by the portfolio could cause the underlying portfolio to mistrack against the Index;
- Temporary unavailability of securities in the secondary market or other extraordinary circumstances could cause deviations from the exact weightings of the Index; or
- In circumstances where securities comprising the Index are suspended from trading or other market disruptions occur, it may be impossible to rebalance the portfolio of securities held by the portfolio and this may lead to tracking error.

# 12.5 SECONDARY TRADING RISK

There can be no guarantee that the portfolio index securities will remain listed on the JSE. Despite the presence of market makers, the liquidity of the portfolio index securities cannot be guaranteed. The portfolio index securities may trade at a discount or premium to their net asset value. Any termination of a listing would be subject to the JSE Limited Listing Requirements.

Notes to the annual financial statements (continued)

for the year ended 31 December 2021

# 12. RISK MANAGEMENT (continued)

### 12.6 INTEREST RATE RISK

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flows. The portfolio is exposed to fair value interest rate risk on fixed interest securities and cash balances.

T 4	4	• 4 • • 4	
Intoroct r	O TO COP	aci fi viitv	7
Interest r	a ic sci	121 (1 / 1 / 1	

	2021 R	2020 R

Cash and cash equivalents	10728	14 080
	(14 628 339)	(14 467 326)

At reporting date a 1% decrease in the interest rate would have increased the net assets attributable to investors by

Portfolio Investments	14 650 313	14 493 848
Cash and cash equivalents	(10728)	(14080)
	14 639 585	14 479 768

# 12.7 CREDIT RISK

Credit risk is the risk of financial loss to the Scheme if a party to a financial instrument fails to meet its contractual obligations. The Scheme is also exposed to credit risks arising from investments in debt securities. The carrying a mounts of the debt securities represent the maximum credit exposure. The debt securities are neither past due nor impaired with the concentration of risk being in the financial services and government sectors.

# Risk limits, control and mitigation policies:

The cash and cash equivalents of the Scheme are placed with reputable financial institutions. The credit risk relating to the other receivables is limited as it relates mainly to interest income receivable from listed securities.

	2021 R	2020 R
Maximum credit risk		
Portfolio Investments	327 294 020	274 191 365

	338 575 035	284 473 592

Notes to the annual financial statements (continued)

for the year ended 31 December 2021

#### 12. RISK MANAGEMENT (continued)

#### 12.7 **CREDIT RISK (continued)**

# Financial assets subject to IFRS 9 impairment requirements

The Scheme's financial assets subject to the expected credit loss model within IFRS 9 are only shortterm receivables. There is not considered to be any concentration of credit risk within these assets. No assets are considered impaired and no amounts have been written off in the period.

All receivables are expected to be received in three months or less. An amount is considered to be in default if it has not been received 30 days after it is due. The carrying amount of other receivables and cash and cash equivalents represents the maximum exposure.

#### **LIOUIDITY RISK** 12.8

Liquidity risk results from both the differences between the magnitude of assets and liabilities and the disproportion in their maturities. Liquidity risk is the risk that operations cannot be funded and financial commitments cannot be met timeously and cost effectively. Liquidity risk management deals with the overall time profile of the current financial position as well as the expected future structure.

# Liquidity risk management process:

The availability of funding through liquid cash positions with various institutions ensures that the Scheme has the ability to fund day-to-day operations.

During rebalancing, proceeds received from the sale of selected constituents are utilised to buy a basket of selected constituents. The approach to managing liquidity risk is to ensure that the portfolio would be able to pay suitable distributions or deemed distribution to investors on a monthly basis. All distributions or deemed distributions are approved by the Trustee and calculated by the administrators.

All of the portfolios' securities are listed instruments and are bought and sold in the JSE Limited through a JSE member. The participatory interest in the portfolio securities can be sold to the market maker, which is obliged to buy them from the investor.

Market makers will attempt to maintain a high degree of liquidity through continuously offering to buy and sell all the Scheme's portfolio participatory interests at prices around net asset value of the participatory interest, thereby ensuring tight buy and sell spreads. Under normal circum stances and conditions the investor will be able to buy or sell the portfolio securities from the market makers.

Per the Trust Deed, the managing Scheme can sell the underlying portfolio assets to meet any short or long term obligation and can borrow up to 10% of the market value of the underlying a ssets.

### 13. FAIR VALUE HIERARCHY OF ASSETS AND LIABILITIES HELD AT FAIR VALUE

### 13.1 FAIR VALUE HIERARCHY

The table below provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 fair value measurements are those derived from quoted prices in active markets and inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The table below shows the portfolio's financial instruments that are recognised and subsequently measured at fair value analysed by level of the fair value hierarchy. The classification of instruments is based on the lowest level input that is significant to the fair value measurement in its entirety. All the fair values disclosed are recurring fair value measurements. The table below sets out the fair value of Level 1, 2, and 3 financial instruments:

	283 063 270	284 446 119	

The valuation technique applied in order to value Level 2 financial instruments is the Net Asset Value which is linked to the adjusted price of the underlying market traded instruments.

# 13.2 FAIR VALUE VERSUS CARRYING AMOUNT OF FINANCIAL INSTRUMENTS NOT HELD AT FAIR VALUE

The fair value of the cash and cash equivalents, other receivables and other payables approximates the carrying value because the instruments are short term in nature. There has been no change in fair values as a result of a change in credit risk.

### 14. SEGMENTAL REPORTING

The investment vehicle offers only one product, being the specific exchange traded fund, tracking the specific identified index.

Information regarding the results of the reportable segment is disclosed in the financial statements as currently set out, thus no further IFRS 8 disclosure is required.

# 16. DISTRIBUTIONS

The Index Securities will effect quarterly distributions after paying all the accrued expenses of the NewFunds Collective Investment Scheme. All distributions are made out of the income of each ETF portfolio.

The quarterly record dates are 23 April 2021, 23 July 2021, 22 October 2021 and 21 January 2022. Holders of the ETF securities ("investors") recorded in the register on the above record dates were entitled to the respective distribution declared.

During the period under review the following distributions were affected by the portfolio:

	2021 R	2020 R
2021: 34.78 cents per security announced 14 January 2021 and reinvested 25 January 2021 (2020: 0 cents per security declared on 16 January 2020 and re-invested	6 211 596	-
27 January 2020)

#### 18. EVENTS AFTER THE REPORTING DATE

Refer to note 16 for distributions declared after year end.

# 19. COVID-19

Due to the coronavirus (COVID-19) pandemic, governments across the world have declared national lockdowns, which have resulted in extensive travel restrictions and quarantine measures being implemented. Businesses globally have had to limit or suspend their operations and as such, the COVID-19 measures implemented by governments globally have severely impacted a wide range of industries, including the financial sector. Due to the global economic downturn, a significant increase in the volatility of the financial and commodities market worldwide has been noted.

This Portfolio is a passively managed portfolio. Despite the COVID-19 pandemic presenting challenges for many entities throughout the nation resulting in price fluctuations seen in the market values of the underlying investments in the potfolio due to the COVID-19, the nature of business and conduct of the portfolio has remained unchanged. The objective of the portfolio remains to replicate the S&P Namibia Sovereign Bond Index as closely as possible regardless of the fluctuations in the price or changes in the constituents of the Index.

The continuing COVID-19 pandemic has not a ffected the Portfolio's a bility to continue as a going concern and the annual financial statements have been prepared on the basis of accounting policies applicable to a going concern.

Notes to the annual financial statements (continued)

for the year ended 31 December 2021

# NEW ACCOUNTING PRONOUNCEMENTS

# Adoption of new and revised Standards

During the current year, the Company has adopted all of the new and revised standards and interpretations issued by the IASB and the IFRS-IC that are relevant to its operations and effective for a nnual reporting periods beginning on 1 January 2021. The adoption of these new and revised standards and interpretations has not resulted in material changes to the Company's accounting policies.

The Company adopted the following standards, interpretations and amended standards during the year:

Interest Rate	Interest Rate Benchmark Reform (IBOR) Phase II The amendments, which are
Benchmark	applicable for financial periods beginning on or after 1 January 2021, address issues
Reform	that might affect financial reporting after the reform of an interestrate benchmark,
(IBOR)	including its replacement with a Iternative benchmark rates. The amendments are as
Phase II	follows:
•	Modifications to financial instruments and lease liabilities which arise as a direct
	consequence of IBOR reform are accounted for by updating the effective interestrate
•	Hedge accounting is not discontinued solely because of the IBOR reform. Hedging
	relationships must be a mended to reflect modifications, and amended hedging
	relationships should meet all qualifying criteria to apply hedge accounting, including
	effectiveness requirements; and
•	Additional disclosure requirements have been included.

Ammural

# New and revised International Financial Reporting Standards issued not yet effective

At the date of authorisation of these financial statements, the following standards and interpretations were in issue but not yet effective:

	Standard	periods beginning on or after
Annual Improve- ments	Amendments resulting from a nnual improvements 2018-2020 Cycle for the following standards:	1 January 2022
•	IFRS 1 - The amendment permits a subsidiary that applies paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by its parent, based on the parent's date of transition to IFRSs.	
•	IFRS 9 - The amendment clarifies which fees an entity includes when it applies the '10 per cent' test in paragraph B3.3.6 of IFRS 9 in assessing whether to derecognise a financial liability. An entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf.	

Notes to the annual financial statements (continued)

for the year ended 31 December 2021

# 19. NEW ACCOUNTING PRONOUNCEMENTS (continued)

IAS 37	Provisions, Contingent Assets and Contingent Liabilities - Amendments specifying which costs an entity needs to include when assessing whether a contract is onerous or loss-making. Costs that are required to be included are those that relate directly to a contract to provide goods or services, and include both incremental costs, as well as an allocation of costs directly related to contract activities.	1 January 2022
IAS 1	Classification of liabilities as current or non-current - Amendments which aim to help companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments include clarifying the classification requirements for debt a company might settle by converting it into equity.	1 January 2023
IAS 1 and IFRS Practice State- ment 2	Disclosure of Accounting Policies - The a mendments require that an entity discloses its material accounting policies, instead of its significant accounting policies. Further amendments explain how an entity can identify a material accounting policy. Examples of when an accounting policy is likely to be material are added. To support the amendment, the Board has also developed guidance and examples to explain and demonstrate the application of the four-step materiality process' described in IFRS Practice Statement 2.	1 January 2023
IAS 8	Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors - The amendments clarify how companies should distinguish changes in accounting policies from changes in accounting estimates. That distinction is important because changes in accounting estimates are applied prospectively only to future transactions and other future events, but changes in accounting policies are generally also applied retrospectively to past transactions and other past events.	1 January 2023
IAS 12	Income taxes - Deferred Tax related to Assets and Liabilities arising from a Single Transaction: Amendments a im at clarifying how companies account for deferred tax on leases; when a lessee recognizes an asset and a liability at the lease commencement.	1 January 2023
Apart from	m the instances detailed above the Company is in the process of assessing	

Apart from the instances detailed above the Company is in the process of assessing the potential impact that the adoption of these standards and interpretations may have on its future financial performance or disclosures in the annual financial statements.
